

OK Music

Community Guide & Manifesto

Your complete guide to music, community, chat, calls, Marketplace, LionCoin & Prediction Contests.

■ Share a Single Track

Tap **Add single track** in the sidebar. Upload an audio file (MP3, M4A, WAV, FLAC...) from your phone or computer — it goes to the cloud so fans on any device can play it instantly.

Or paste a public streaming link (SoundCloud, Google Drive, Dropbox...). Add a cover photo, pick a genre, set Public or Private, then publish.

■ Share a Folder / Album / Playlist

Tap **Add a folder** to upload a whole set of tracks at once.

- **On mobile:** select multiple files and give them a playlist name.
- **On desktop** (Chrome / Edge): pick an entire folder from your computer, Google Drive, Dropbox, or iCloud. Every track uploads to the cloud for all your fans.

■■ Photos — All Formats Supported

Upload photos in any format — JPG, PNG, WEBP, HEIC/HEIF (iPhone), BMP, TIFF, AVIF, and more.

This applies to your profile photo, banner, page background, and marketplace product photos. No conversion needed — the platform handles it automatically.

■■ Playback & Mini-Player

Tap any track art or title to play. The mini-player stays at the bottom while you browse. Use the mode button to switch between:

- **Continuous** — plays the whole playlist in order
- **Shuffle** — random order
- **Repeat one** — loops the current track

Tap the progress bar to seek. Tracks are cached after the first play for offline listening.

■ Personalise Your Page

Go to **Edit profile** to upload a profile photo, write your bio, set a banner image, and set a full-page background.

Choose a colour theme or solid colour for the banner. All changes are saved instantly and visible to every fan on every device.

■ Discover, Follow & Grow Your Fanbase

Go to **Discover** to browse all artists and tracks. Search by name. Click **Follow** on any profile — they'll get a notification.

Privacy option: In Settings → Privacy, enable “Approve fans manually”. New followers must send a request — you accept or decline.

You can also remove a fan at any time from **My Fans**. Post statuses on your Wall to talk to your followers. Fans can like, dislike, and comment on your tracks and posts.

■ Presence Status

Your status is shown to your connections — **Online** when you're active, **Offline** when you close the tab, and **Busy** when you want to signal you're unavailable.

Toggle Busy from the **My Fans** page. Status updates automatically within minutes.

■ Buzzing & My Feed

Buzzing shows the hottest tracks right now, ranked by plays and likes.

My Feed shows the latest posts from artists you follow.

■ Private Messenger — End-to-End Encrypted

Go to any profile and tap **Message**. All messages are end-to-end encrypted — only you and the other person can read them. Nobody else, not even the platform, can access the content.

Inside a chat you can:

- Edit a message you sent
- Delete for me or Delete for everyone
- Send photos, audio, and files
- See the other person's live presence status

You hear a ping when a new message arrives. Privacy settings let you control who can message you.

■ Free Voice Calls

Inside any chat, tap **Call** to start a free real-time voice call.

The other person hears a ring tone and can tap **Accept** or **Decline**. Mute yourself, see the call timer. Completely free, peer-to-peer.

■ LionCoin (LNC) — The OK Music Loyalty Token

LionCoin is the platform's internal reward currency. Every meaningful action you take on OK Music earns you LNC automatically:

- **+1 LNC** every time someone plays your track (unique per listener per day)
- **+10 LNC** when you upload a track
- **+3 LNC** when you post a status
- **+2 LNC** when someone comments on your content, **+1 LNC** when you write a comment
- **+0.5 LNC** for every reaction your content receives
- **+5 LNC** for every new fan, plus milestone bonuses at 10, 100, 1 000, and 10 000 fans
- **+2 LNC** daily login — **+50 LNC** at a 7-day streak, **+300 LNC** at 30 days

Your wallet is at **LionCoin** in the sidebar. It shows your live balance, total earned, total spent, current streak, and a full transaction history. Your balance is private by default — you can make it public in wallet settings.

Spending & Sending LNC

In the Marketplace, sellers can set a LNC price on their products. Pay instantly from your wallet. Or send directly to any user: tap **Send LNC** on their profile.

5% Transfer Fee — Why It Protects You

■ NEW — 5% fee on all LNC transfers

All LNC transfers — whether for marketplace purchases or direct peer-to-peer sends — carry a **5% fee that is burned from circulation**. This means 5 LNC out of every 100 LNC transferred is permanently removed, reducing total supply over time.

The fee is shown clearly on the confirmation screen before you commit, so there are no surprises. Burning keeps LionCoin scarce and protects the value for every holder in the community.

What LionCoin Can Become

Today it is a loyalty and exchange token. As the community grows, LionCoin is designed to evolve — potential future directions include redemption with external partners, a creator economy, and a community-governed rate. The value is entirely determined by users; the platform does not set an exchange rate.

■ Prediction Contests — Win LionCoins

Click **Contests** in the sidebar to see all active prediction contests. Each contest poses a question about music, the charts, or the OK Music community — and awards a LNC prize to every user who picks the correct answer.

How to Play

- Browse open contests (look for the pulsing **Open** badge) and read the question carefully
- Tap the answer you believe is correct — a “Validate your answer” screen shows the prize before you commit
- Your pick is locked in permanently — one pick per contest, no changes after confirming

Winning

When the admin resolves a contest by selecting the correct answer, every user who picked right receives the full prize instantly — credited automatically to your LionCoin wallet. Your contest card turns green and shows a banner with the amount you won. The transaction appears in your wallet history.

Transparency & Corrections

If an error is discovered, the admin can correct the answer with a mandatory written reason. The correction is logged publicly in the contest’s audit trail. Coins are automatically reversed from incorrect winners and re-credited to the correct ones — everything is transparent.

■ Marketplace — Buy & Sell

■ Sell

Open your store, list products with photos, description, USD price, and an optional LNC price. Set a stock quantity or leave it unlimited. You receive **97% of each USD sale** (3% platform fee), or **95% of each LNC sale** (5% LNC fee, burned) paid instantly to your wallet.

■ Smart Categories — for Sellers & Buyers

■ NEW — Custom categories instantly searchable by all buyers

Every product is assigned a category when listed. Choose from 13 standard categories (Electronics, Fashion & Apparel, Books, Music & Audio, Digital Products, Art & Collectibles, Services, and more) — or type your own in any language.

Dynamic registry: every custom category a seller creates is automatically added to the global filter so buyers can browse it immediately. No admin approval needed — the marketplace self-organises around what sellers are actually listing.

■ Browse & Filter

Buyers can narrow down products by:

- **Category** — including every custom category sellers have ever created
- **Location** — find sellers near you
- **Price range** — set a minimum and maximum
- **Search** — keyword search across title, description, and seller name
- **Sort** — newest first, price low-to-high, price high-to-low

■ Reserve — Pickup or Delivery

■ NEW — Reserve physical products with pickup or delivery

For physical products, tap **Reserve — Pickup or Delivery** on any listing. Choose your fulfilment method:

- **Pickup:** select a preferred date and time to collect from the seller
- **Delivery:** enter your delivery address and preferred date/time
- Add an optional note for the seller

Your reservation is saved instantly and opens a private chat with the seller, pre-filled with all the details — no back-and-forth needed to get the basics right. The seller can accept, discuss, or propose alternatives directly in the conversation.

■ Buy & Pay

Tap any product photo to zoom. Tap **Buy Now** (or **Add to Cart**) to purchase.

- **Payoneer (USD):** enter your details at checkout
- **LionCoin:** if the seller accepts LNC, tap **Buy with LNC** — instant, no checkout form needed
- **Cart:** add multiple products and check out all at once

✕ Cancel an Order

■ NEW — Cancel pending orders directly from My Orders

Changed your mind? Go to **My Orders** in the sidebar. Any order that hasn't been processed yet shows a **Cancel** button. Tap it, confirm, and the order is cancelled immediately — no need to message the seller.

■ Print-on-Demand Merch (Printify)

Some sellers offer print-on-demand products — custom T-shirts, hoodies, mugs, and more — printed and shipped worldwide directly from the manufacturer. These listings are available in the Marketplace alongside regular products. If a print-on-demand product is temporarily unavailable, you can always use the **Reserve** option to contact the seller directly.

■ Privacy & Security

- **Private profile** — only followers see your tracks and posts
- **Approve fans manually** — control who can follow you
- **Who can message / call me** — Everyone, Followers only, or Nobody
- **Hide from Discover & Search** — stay invisible to browsing users
- **Block & Report** any user from their profile
- **Security Centre** — see all active sessions, sign out remotely, view your activity log

All settings in **Settings** (sidebar or your profile).

■■ Good to Know

- Tap any profile photo to view it full size
- Your music is yours — only you can edit or delete your tracks
- **Private tracks** are visible only to you
- Add a streaming link: My Music → track menu → Add streaming link
- Use **Suggest a Feature** in the sidebar to send us ideas — we read every one
- Sign in with Google or email on any device to access your full profile, music, and wallet
